INFORMATICS INVESTIGATORY PROJECT

CLASS XII CBSE

REGISTER NUMBER:

This is to certify that the INFORMATICS INVESTIGATORY project titled TAVA BASED PEGASUS BOOK STORE has been successfully completed by MUSAAB of class XII in practical fulfillment of curriculum of CENTRAL BOARD OF SECONDARY EDUCATION (CBSE) leading to the award of annual examination of the year 2019-2020.

Teacher-in-charge:

Submitted for the Practical Examination on 25/01/2020 held at International Indian School, Ajman.

External Examiner:

ACKNOWLEDGEMENT

In the accomplishment of this project successfully, many people have best owned upon me their blessings and the heart pledged support, this time I am utilizing to thank all the people who have been concerned with the project.

*Primarily I would thank God for being able to complete this project with success. Then I would like to thank my Informatics Teacher **MRS.IRFANA** and **MRS.QURAT-UL-AIN(PRINCIPAL)**, whose valuable guidance has been the ones that helped me patch this project and make it full proof success their suggestions and her instruction has served as the major contribution of the project.*

Then I would like to thank my parents and friends who have helped me with their valuable suggestions and guidance has been helpful in various phases of the completion of the project.

OBJECTIVES

The main objective of this project is to:

- *Demonstrate the importance of a database system.*
- *Emphasize the need of saving data in the database.*
- *Study the concept of front end and back end of an application software.*
- *Using an object oriented programming tool Java to develop a front end graphic user interface.*
- *Connect a GUI interface with data stored in database.*
- *Use various methods to store and retrieve data from a database.*
- *Write a complete GUI application with database connectivity.*
- *Apply the knowledge gained in commercial business environment.*

INTRODUCTION

In order to connect to a database from within an application, we need a framework that helps us send and execute SQL statements from within the application code. The most popular programming interface for accessing relational database is ODBC (Open Data Base Connectivity). But ODBC is Microsoft's API which cannot be directly used from within Java. If you want to connect to a relational database (e.g., MySQL's or Oracle's) from within a Java application, we can do it using JDBC (Java Data Base Connectivity) API of Java. You may even use JDBC-ODBC connector that is JDBC layer over ODBC but JDBC is a better choice for accessing databases like MySQL.

What Does JDBC do?

JDBC mainly does following tasks from within a Java application code:

- Establish a connection with a database.*
- Send SQL statements to database server.*
- Process the results obtained.*

In this project we will learn how we can establish database connection from our Java applications and process the retrieved.

HARDWARE AND SOFTWARE REQUIREMENTS

HARDWARE

- 1. Processor - Intel core i3-3240 CPU**
- 2. Memory - 1.8 GB**
- 3. O.S Type - 64 bit**
- 4. Disk - 490.1 GB**
- 5. Graphics - Intel Ivy Bridge Desktop**

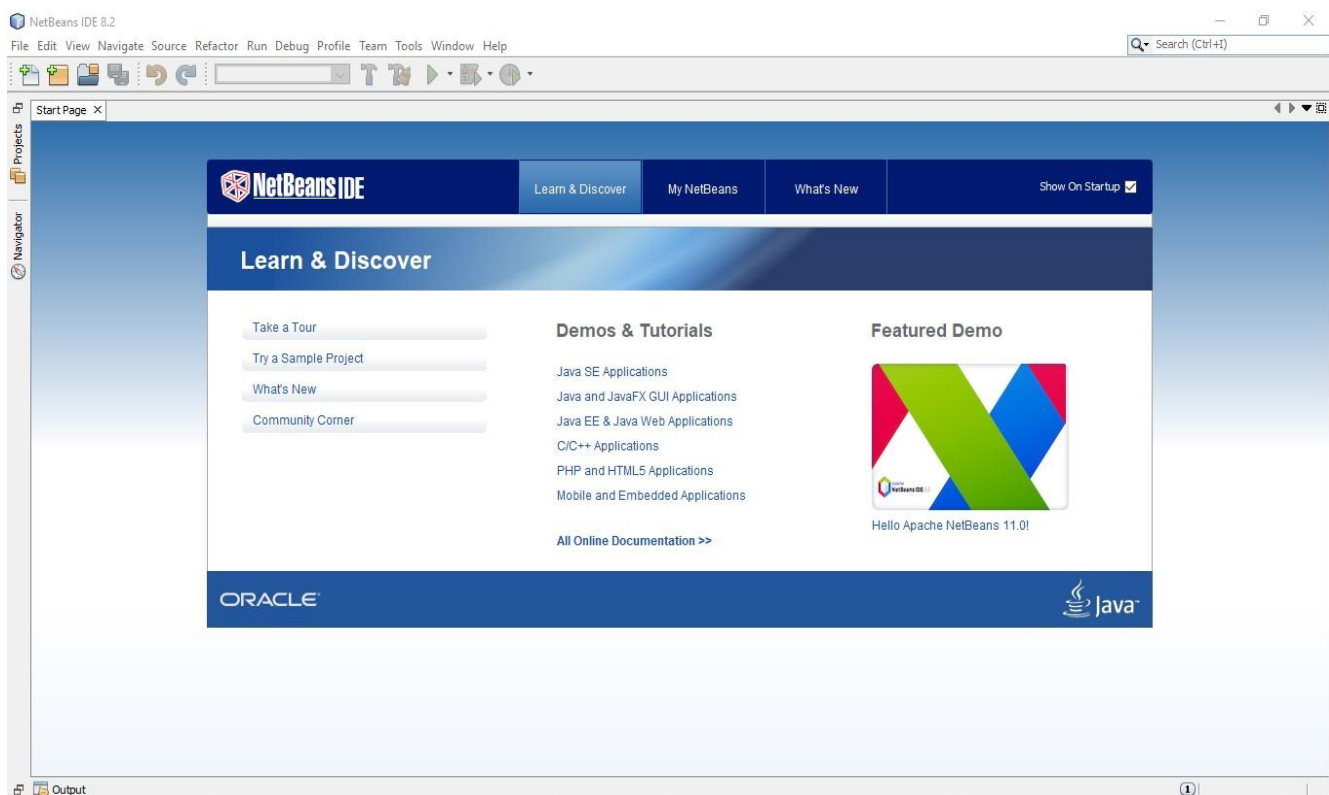

SOFTWARE

- 1. Front End - NetBeans**
- 2. Back End - MySQL**
- 3. Operating System - Linux**

GUI Applications (The Front end)

The programmer develops applications for showing problems with the help of GUI applications know as Front end. The data entered by us in a front end application will get stored in temporary memory (RAM) and not getting saved on a hard disk (or any other secondary storage device). So, a back end is needed to store the data permanently.

Example: -Net beans programming.

Important features **of the frontend** **applications: -**

- **Consistency: -**

Every actions and events are stable in all forms which makes the user easy to understand the designing and coding.

- **Make it convenient for the user: -**

By setting or modify the properties we can make a good appearance for the applications.

Some of the controls needed are JLabel, JTextField, JButton, JRadioButton, JTextArea, etc.

DATABASE (BACK END)

Back-end means data base.it helps us to save data permanently and keeps data ready for future reference, modification and addition. For performing these activities, we required to learn SQL commands like create, Update, Insert, Delete, etc.

EXAMPLE: MySQL

```
mysql> use kindler;
Database changed
mysql> select * from cart;
+-----+-----+
| bookname | price |
+-----+-----+
| INFINITY GAUNTLET | 500 |
| HOBBIT | 250 |
| SHAPEOFWATER | 250 |
| ALBERTEINSTEIN | 300 |
+-----+-----+
4 rows in set (0.05 sec)

mysql> select * from delivery;
+-----+-----+-----+
| name | address | billamount |
+-----+-----+-----+
| john | deira dubai | 1300 |
+-----+-----+-----+
1 row in set (0.00 sec)

mysql> select * from signup;
+-----+-----+-----+-----+
| name | email | username | password |
+-----+-----+-----+-----+
| pegasus | pegasusstore@gmail.com | PEGASUS | WICK |
+-----+-----+-----+-----+
1 row in set (0.00 sec)

mysql>
```

ABOUT OUR PROJECT

OUR PROJECT IS ABOUT MAKING PROGRAM ABOUT BOOKSTORE. WE OFFER MAINLY FICTION AND NON FICTION BOOKS THAT CONSIST OF MEMOIR, SELF-HELP, AND BIOGRAPHY/AUTOGRAPHY BOOKS. ACTION AND ADVENTURE, FANTASY, COMICS AND SCI-FI BOOKS. WE OFFER AN EXPENSIVE CATERING OF E-BOOKS AT REASONABLE VALUING.

WE WELCOME MODESTLY EVERY ONE TO OUR [PEGASUS BOOK STORE](#). WE PROVIDE YOU WITH ALL NECESSARY INFORMATION REGARDING BOOKS IN OUR STORE. YOU CAN KEEP IN TOUCH WITH US FOR NEW MUSINGS AT pegasusbstore@gmail.com HELPING US TO AD LIB FOR PERUSER FULFILLMENT.

ABOUT US PAGE

ABOUT US

"I PRONOUNCE AFTER

ALL THERE IS

NO PLEASURE LIKE PERUSING!" - JANE, PRIDE AND PREJUDICE

DEAR READERS,

WE OFFER TREMENDOUS GATHERING OF BOOKS IN VARIOUS CLASSIFICATION OF FICTION AND NON FICTION TYPES OF BOOK, THATS AUTOBIOGRAPHY/ BIOGRAPHY MEMOIR AND SELF-HELP BOOKS AND ACTION AND ADVENTURE, FANTASY, COMICS AND SCI-FI BOOKS. WE ALSO SUPPORT TO OFFER AN EXPANSIVE GATERING OF E-BOOKS AT REASONABLE VALUING.

WE MODESTLY WELCOME EVERY ONE OF MERCHANT AROUND INTERNATIONAL TO BAND TOGETHER WITH US. WE WILL WITHOUT A DOUBT GIVE YOU STAGE TO MANY SHIMMERING AREAS AND DEVELOP THE "PEGASUS BOOKSTORE". WE MIGHT WANT YOU TO THANK YOU ALL FOR SHOPPING WITH US AND VISITING OUR STORE. YOU CAN KEEP IN TOUCH WITH US FOR ANY NEW MUSINGS AT "pegasusbstore@gmail.com" HELPING US TO AD LIB FOR PERUSER FULFILLMENT.

CONCLUSION

This project was a great opportunity to connect theoretical knowledge to practical implementation in a real time work scenario.

On successful completion of this project, we were able to understand and implement the following:

- *Create Java programs that solves simple business problems*
- *Understand the importance of system analysis, system designing, data structure creation, program coding, testing, decoding the errors and implementation aspects in a software development.*
- *Validate user input.*
- *Create data structure using MySQL.*
- *Connects the front end JAVA pages to the back end MySQL.*
- *Troubleshoot the program error and rectify the errors.*
- *Perform a test plan to validate a JAVA program.*
- *Document a JAVA program.*
